## INSTALLATION INSTRUCTIONS

1. Switch off the mains power supply in the consumer unit (fuse box).
2. If retro fit remove the existing wall socket from the wall.
3. Prepare the mounting surface area clearing away any plaster debris and dust from the inside the mounting box.
4. If using the included spacer slide it over the back of the wall socket.
5. Following the diagram overleaf push the cables into the relevant terminal blocks. (features dual earth terminals, either or both can be used).
6. All earth wires must be sleeved and terminated to the backbox.
7. Tighten the terminal screws firmly and securely.
8. This device must be earthed.
9. Screw the wall socket securely to the wall using the screws provided.
10. Switch the mains supply back on in the consumer unit (fuse box) when the installation has been correctly completed.
11. Before use we recommend that a socket test is carried out using a socket tester.
