DESCRIPTION

Our OM3 (50/125) optic fibre cables are perfect if you require fast data transfer speeds or to connect devices over long distances. Fibre optic cables use light to transmit data, which makes them much faster than traditional copper cables. They are often used in data centres, telecommunication networks or to connect servers together.OM3 cables are a specific type of fibre optic cable, designed for use in high-bandwidth applications, such as 10 Gigabit Ethernet up to 300m transmission distance.
