

USB 3 Adapter Type C Male to A Female - with OTG Function

Brand: **connektgear**
Code: 26-0430
Box Qty: 1000

Why do you need it?

You need an adapter featuring OTG Function that will connect your USB Type C device to a USB Type A device from an adapter that will provide SuperSpeed data transfer speeds, error free transmission along with charge & sync capabilities.

What does it do?

Transforms a USB C port into a Type A port allowing you to use your older USB devices with your new Type C devices.

This adapter features OTG Function, this will enable your smartphone or tablet to become the main device (If an adapter without OTG Function is used your phone will be set as the storage device and your computer the main device). You'll now be able to connect devices such as a memory stick, a HDD, our standard USB mouse and keyboard to your mobile device. Ideal if you want to type up a report on your mobile device with a keyboard or transfer files from one device to another.
